Nationality: Liberian
Current Location: Rwanda

PERSONAL PROFILE

I am El-Thomas Diggs Hinneh, a motivated and innovation-driven Liberian Food Biotechnology student currently pursuing my Bachelor of Science degree at INES Ruhengeri Institute, Rwanda. I hold an Associate of Arts degree in Agriculture and Food Sciences from Grand Bassa University (GBU), Liberia.

With a strong academic foundation in food technology, I am passionate about food quality control, postharvest technology, and value addition of agricultural products. My long-term vision is to become a successful Agropreneur and Food Technologist CEO, contributing to food security, product innovation, and agro-industrial development in Africa.

ACADEMIC BACKGROUND

1. Bachelor of Science (BSc) in Food Biotechnology | INES Ruhengeri Institute – Rwanda | (Currently Ongoing)

2. Associate of Arts (AA) Degree in Agriculture & Food Sciences | Grand Bassa University (GBU), Liberia | 2019 – February 2024

3. Electrical Technician Certificate | LOIC Buchanan Satellite | 2015

4. High School Diploma | Bassa High School System (BHSS) | 2013 – 2014

5. Elementary Education | Bassa Elementary Demonstration School (BEDS) | 2006 – 2007

6. Kindergarten Education | Sarah Samson Joy Kindergarten School | 2000 – 2002

RESEARCH & ACADEMIC FOCUS

My academic and research interests include:

- Food Quality Control and Safety Systems
- Postharvest Loss Reduction
- Nutritional Enhancement of Cassava-Based Products
- Fermentation Technology
- Food Processing & Preservation
- Value Addition of Agricultural Commodities

I am particularly interested in developing innovative food products that enhance nutritional value while remaining affordable and marketable within African food systems.

TECHNICAL & LABORATORY SKILLS

Laboratory & Analytical Skills

- Proximate analysis
- Microbial culturing techniques
- Food safety evaluation
- Quality control testing
- Postharvest handling assessment

Food Processing Skills

- Tomato paste and ketchup formulation
- Chili oil and sauce production
- Mayonnaise production
- Spice blending and sauce formulation
- Cassava processing and product development

Professional Skills

- Research writing
- Data collection and analysis
- Product development planning
- Agro-entrepreneurship strategy
- Leadership and teamwork

PRODUCT DEVELOPMENT INTEREST

I have strong interest in value-added food production including:

- Nutritionally enhanced cassava products
- Tomato paste and ketchup
- Tomato sauce and chili sauce
- Chili oil
- Mayonnaise
- Spice sauces and seasoning blends

My goal is to transform locally available agricultural raw materials into competitive, high-quality food products for both local and regional markets.

LEADERSHIP & COMMUNITY BACKGROUND

Raised by my grandparents, Mr. & Mrs. Diggs, in Buchanan, Grand Bassa County, Liberia, I developed strong values of discipline, resilience, and responsibility. These values continue to guide my academic and professional journey.

I actively participate in student and community initiatives and aim to use food science knowledge to empower youth and small-scale food processors.

CAREER OBJECTIVES

My long-term goal is to become a leading Agropreneur and Food Technologist CEO, establishing a food processing enterprise that:

- Reduces postharvest losses
- Improves food nutritional quality
- Promotes food safety standards
- Creates employment opportunities
- Enhances food security in Africa.
